

IN THE CLAIMS:

1. (Currently Amended) An adhesive film for a display, comprising:
a transparent substrate,
an anti-reflection layer provided on one surface of said transparent substrate, and
an adhesive layer provided on the other surface of said transparent substrate, said anti-reflection layer and said adhesive layer each having a predetermined color for rendering said adhesive film achromatic when said layers are mixed predetermined color of said anti-reflection layer is mixed with said predetermined color of said adhesive layer.

2. (Currently Amended) The adhesive film ~~in accordance with~~ according to claim 1, wherein said anti-reflection layer further has an anti-reflection function.

Claim 3 (withdrawn).

4. (Currently Amended) The adhesive film ~~in accordance with~~ according to claim 2, wherein said anti-reflection layer contains a hard coat material.

5. (Currently Amended) ~~An~~ The adhesive film ~~for a display, in accordance with claim 2 according to claim 1,~~ wherein said ~~optical functional layer contains a hard coat material~~ anti-reflection layer is formed by a radiation curable resin.

Claim 6 (withdrawn).

7. (New) The adhesive film according to claim 1, wherein said adhesive layer comprises an acrylic adhesive.

8. (New) The adhesive film according to claim 2, wherein said adhesive layer comprises an acrylic adhesive.

9. (New) The adhesive film according to claim 7, wherein said acrylic adhesive is copolymerized by at least a monomer having a carboxyl group and/or hydroxyl group.

10. (New) The adhesive film according to claim 8, wherein said acrylic adhesive is copolymerized by at least a monomer having a carboxyl group and/or hydroxyl group.
